

III Workshop 2024 - EMBM-VD

Modelagem de SARP's em ambiente de AR

CONTEXT:

- Development of an Android application for Drone monitoring;
- AR technology integrated with Android device sensors like GPS, gyroscope, and camera.

GOALS OF THIS PRESENTATION

- Show the current status of the application development
- Show the next steps regarding the app development process

SUMMARY

- General overview
- Unity for AR
- Device's sensors (GPS, gyro and compass)

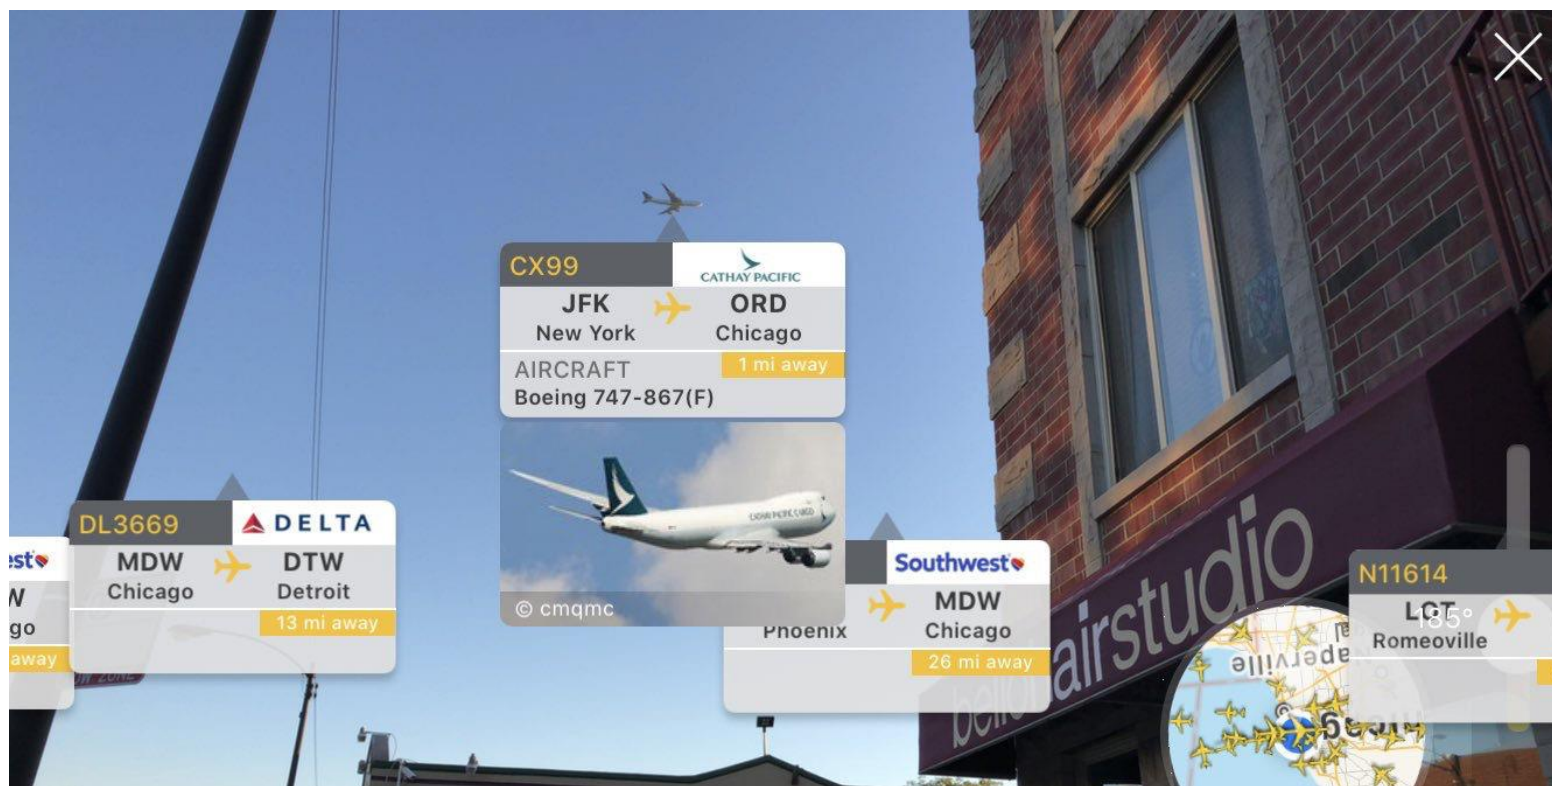

Projects and Deliveries

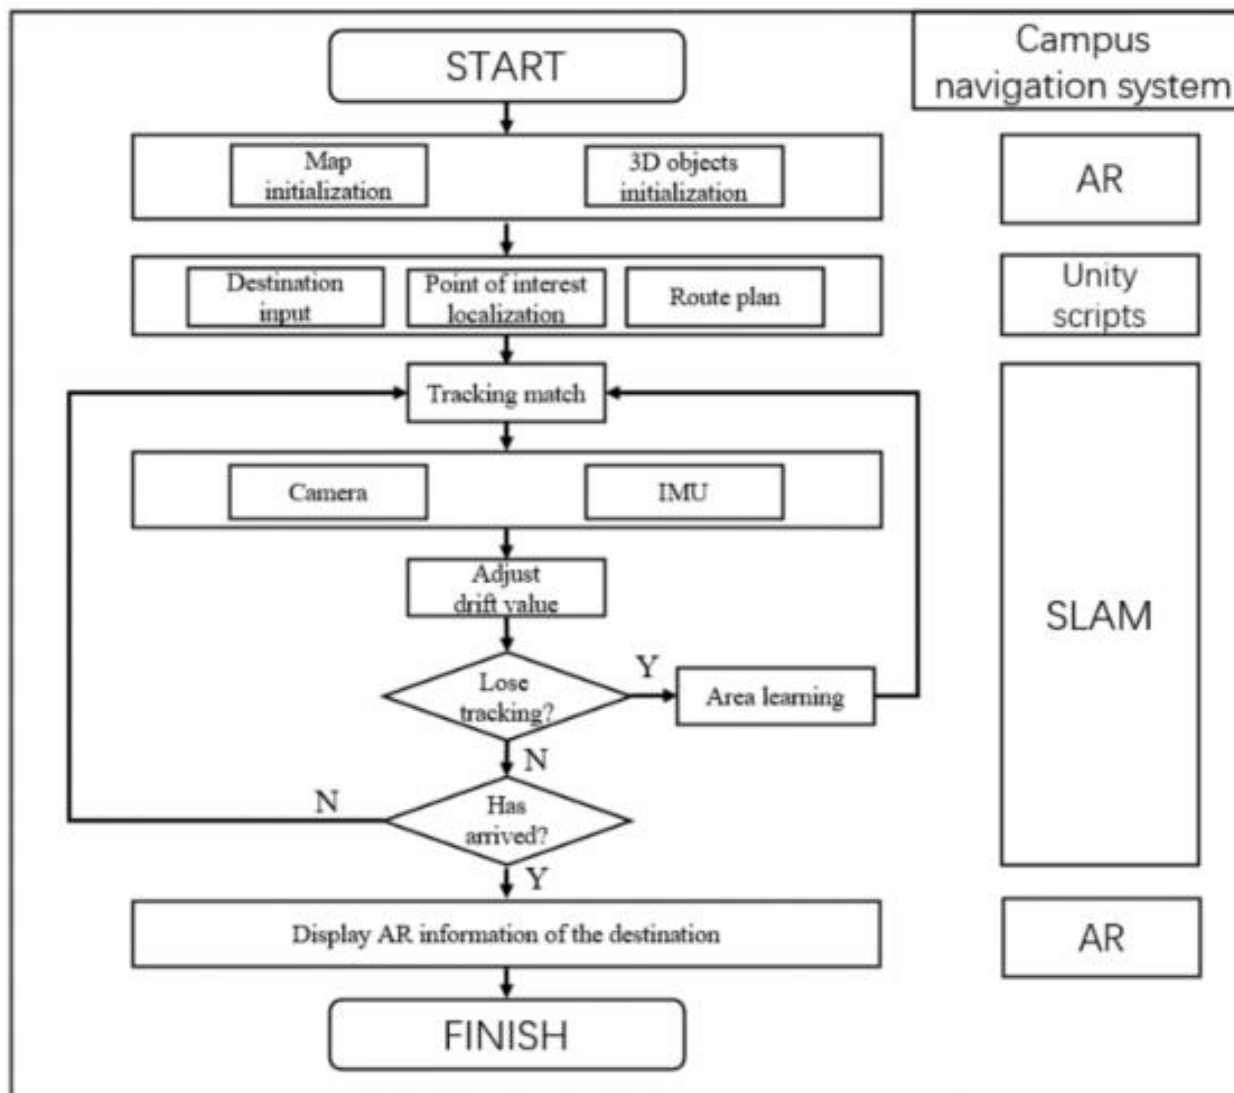

General overview

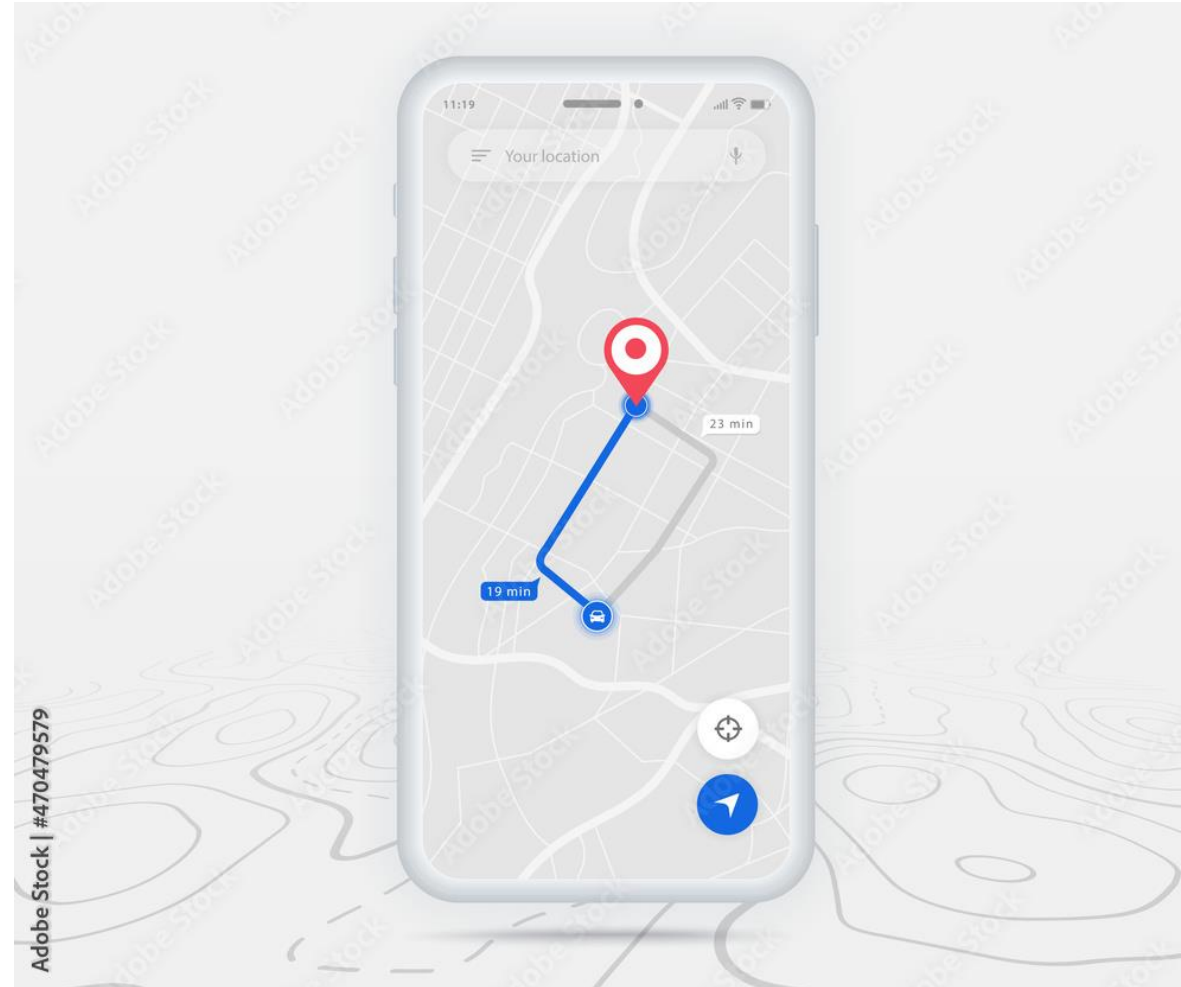

- Real-time Airspace Monitoring

Architecture

Future development

Final considerations

Questions/Comments?!
